

The NEM Foundation is a non-profit foundation that manages the NEM blockchain, an out-of-the-box enterprise-grade blockchain platform launched in March 2015. NEM has industry leading blockchain features which include multisignature account contracts, customizable assets, a naming system, encrypted messaging, and an Eigentrust++ reputation system. Companies with legacy systems can “plug ‘n play” with NEM.

The NEM Foundation has a global presence and is dedicated to spreading knowledge about the NEM blockchain and provide services that will enable the people to grow and help the economy progress.

The Foundation is especially active in Southeast Asia and has opened a NEM Blockchain Centre located in Kuala Lumpur that serves as its headquarters for regional operations while also acting as a learning centre, incubator and accelerator for blockchain related startups.

Visit www.nem.io for more information on NEM and the NEM Foundation or visit www.nem.my, for more details on the NEM Blockchain Centre in Kuala Lumpur.
